

Experience Dentistry Reimagined at Green Room Dentistry

If you've ever wished for a dental experience that feels calm, welcoming and genuinely centred around you, then Green Room Dentistry offers something refreshingly different. Nestled within tranquil gardens in the heart of Newquay, Cornwall, this award-winning private dental practice has been redefining what it means to visit the dentist for over two decades.

Founded in 1999 by husband-and-wife team Richard and Sally Hudson, the practice was built on a simple yet powerful idea: dentistry should be something people feel good about. Today, that philosophy still shines through in every aspect of the patient journey. From the warm welcome you receive on arrival to the exceptional results delivered by a highly experienced clinical team.

A Practice Designed Around You

From the moment you step through the doors, Green Room Dentistry feels different. Set within an acre of peaceful surroundings, the practice offers a light, airy and calming environment - far removed from the clinical feel many associate with dental visits. Patients frequently comment on the relaxed atmosphere, friendly staff and the sense of confidence they feel even before treatment begins.

This patient-first approach extends far beyond aesthetics. Every consultation is tailored to the individual, with time taken to understand your concerns, explain your options and create a clear, personalised treatment plan. Whether you're attending for a routine check-up or a complete smile transformation, you'll always feel informed, supported and in control.

Comprehensive Care for Every Smile

Green Room Dentistry provides a full range of modern dental treatments under one roof, combining advanced technology with clinical expertise. Preventative care lies at the heart of the practice, helping patients maintain healthy teeth and gums for life through regular reviews, hygiene appointments and expert advice.

For those looking to enhance their smile, cosmetic dentistry options include teeth whitening, veneers and clear aligners designed to restore both confidence and appearance. Meanwhile, restorative treatments such as crowns, bridges and dental implants offer durable, natural-looking solutions for damaged or missing teeth.

The practice is also known for its gentle approach to nervous patients. With a team skilled in managing dental anxiety, many patients who once avoided the dentist now feel comfortable, relaxed and even confident during their visits.

Quality, Transparency and Long-Term Value

At Green Room Dentistry, the focus is always on delivering lasting results rather than quick fixes. Patients receive clear explanations of treatment options, costs and expected outcomes before any work begins, ensuring complete transparency and peace of mind.

Flexible payment options, including membership plans and interest-free finance, make it easier to spread the cost of care while maintaining excellent oral health.

The emphasis is firmly on prevention and long-term wellbeing, helping patients to avoid more complex issues in the future.

A Reputation Built on Trust

With decades of combined experience, multiple awards and a loyal patient base spanning generations, Green Room Dentistry has earned a reputation for excellence. Many patients travel significant distances for their appointments, drawn by the combination of clinical skill, advanced technology and genuine care.

Testimonials consistently highlight the professionalism of the team, the quality of treatment and the welcoming atmosphere that sets the practice apart. For many, it's not just a dental clinic, it's a place where they feel valued, understood and confident in their care.

Your Journey Starts Here

Whether you're new to the area, seeking a fresh start with your dental health, or simply looking for a practice that truly listens, Green Room Dentistry offers an experience designed around you.
